

Organisers

Sri Lanka Sustainable Energy Authority – SLSEA

The SLSEA is an apex institution in Sri Lanka established for the purpose of leading the country towards a new level of sustainability in energy generation and use through the dual thrust of increasing indigenous energy and improving energy efficiency. Its mission is to guide the nation to develop indigenous energy resources and conserve energy resources through exploration, facilitation, research & development and knowledge management in the journey of national development, by protecting natural, human and economic wealth by embracing the best sustainability practices.

Tea Research Institute – TRI

The TRI conduct, assist and encourage scientific and technological research into, and investigations of, all problems and matters affecting production and manufacturing of tea. It has scientific divisions and advisory and extension division to execute these activities. The Technology Division, one of the scientific divisions joins with SLSEA and arranges training programmes on “Building In-house Capacity of the Tea Sector on Energy Conservation and Management” for the factory staff.
