

SRI LANKA SUSTAINABLE ENERGY AUTHORITY
A Statutory Authority within the Ministry of Energy

Application for Registration of ISO 50001 Consultants
--

PART A:

GUIDELINES FOR REGISTRATION

The **Sri Lanka Sustainable Energy Authority (SLSEA)** is the authorized government institute for implementing energy efficiency improvements and conservation activities in the country. In order to promote structured energy management practices and internationally recognized standards, SLSEA will facilitate organizations operating in the field of ISO-based energy and sustainability systems.

Special emphasis is placed on the adoption and implementation of **ISO 50001 (Energy Management Systems – EnMS)**, which supports continuous improvement in energy performance, including energy efficiency, and consumption.

For this purpose, individual consultants are encouraged to register with SLSEA as ISO 50001 Service Providers.

Eligibility Requirements

For any individual to be registered as ISO 50001 service provider:

- He/She should be a qualified professional with proven expertise in **energy management systems**, particularly **ISO 50001**
- He/She should possess recognized certifications such as:
 - ISO 50001 Lead Auditor / Lead Implementer
 - Energy Auditor (preferably accredited by SLSEA)

- Curriculum Vitae of the applicant should be attached
- Documentary evidence of qualifications, certifications, and relevant project experience must be submitted
- Applicants must demonstrate experience in energy performance improvement, energy audits, or EnMS implementation

General Requirements for All Applicants

- I. Registered consultants should submit a annual performance report detailing:
 - ISO 50001 implementations
 - Energy savings achieved through EnMS projects
 - Energy audits and improvements facilitated

Failure to submit report over a period of one year may lead to cancellation of registration.

- II. SLSEA will conduct periodic progress review meetings, and all registered consultants are required to participate.

Facilitation Provided by SLSEA

Registered consultants are provided with state recognition for contributing to the implementation of ISO 50001 and related standards.

- I. SLSEA will support:

Promotion of ISO 50001 adoption across industries through
Awareness programmers on energy management best practices

- II. SLSEA will facilitate access to:

Technical guidance for energy performance improvement

III. SLSEA will continue to provide updates on policies, incentives, and national programmers related to energy management systems.

5. Required Documents

To support your submission, please attach the following documents. Ensure all documents are complete, accurate, and clearly labeled:

Annexure 01: Scope of Services

A detailed description of the services you provides, particularly in relation to ISO 50001.

Annexure 02: Consultant Details

Curriculum Vitae of the Applicant, Educational Certificates, Professional certificates, Details of experience related to ISO 50001 projects.

Annexure 03: Client List

A list of your clients, especially those related to ISO 50001 works, including basic project details where applicable.

6. Declaration

I hereby certify that the information provided in this application is true and correct.
