

## **SRI LANKA SUSTAINABLE ENERGY AUTHORITY (SLSEA) Registration of High End Energy Consumers**

Sri Lanka Sustainable Energy Authority wishes to develop programmes to tackle the upcoming energy crisis during the dry season, targeting the industrial and commercial sectors with the objective of saving 32,000,000 units of electricity (32GWh) and also to contribute to the national energy saving mission launched with the objective to relieve the demand burden on the national grid by a 182 MW during the peak demand period.

If your organization is using above 10,000 kWh per month, please register with Sri Lanka Sustainable Energy Authority using the following link on or before 31/01/2023. The first ten entities registering with us will be eligible for an energy audit conducted by Accredited Energy Auditor free of charge, in recognition of their commitment to save energy.
